## G260 - G600 Mobile Environmental Generators

Our mobile environmental generators are engineered for reliable performance. They are designed to be compact and quiet, while powering a full load in extreme temperature conditions.

The fluid containment system offers double-wall protection, keeps fluids from creating environmental hazards and provides 24-hour minimum run times. These generators also feature AREP technology for best-in-class motor starting capability.

Product improvement is a continuing goal at Ingersoll-Rand.

Designs and specifications are subject to change without notice or obligation.

## **KEY FEATURES**

- Fluid containment system ensures all fluids are isolated from the surrounding environment.
- AREP alternator delivers maximum capability in a compact package, so you can start bigger motors at less cost.
- Intellisys<sup>™</sup> control system is easy to use, yet allows for a high degree of customization for more specialized applications.
- The mobile trailer system with independent drawbar, fenders, and axles are optimized for versatility and ruggedness.
- Units are optimized for size and sound and deliver a full load in extreme temperature conditions.
