

## RENT FROM THE EXPERTS *BECAUSE POWER MATTERS™*

Kelly Generator & Equipment, Inc. is a full service company that rents generators, supplies, and all the required electrical and mechanical equipment to get you powered up. We can provide your rental needs for any size application. We specialize in generators and our team is prepared to help you with your rental needs. We have a full rental fleet stocked and ready to go at a moment's notice and have the capability to provide multiple volume units for your power needs. KG&E delivers more than generators; we give you power.

### **YOUR POWER SOLUTION COMPANY:**

Our comprehensively trained team of rental professionals and technicians are prepared to deliver the right power generation equipment for the job or to design the most efficient and affordable custom system for your unique power needs. Typical applications include:

- Oil & Gas
- Construction
- Backup Power
- Medical Facilities
- Telecommunications
- Manufacturing
- Concerts/Festivals
- Remote Locations

### **RENTAL GENERATOR FEATURES:**

- Sizes from 20 kW to 2 MW, parallel up to 9 MW
- Weatherproof enclosures
- Built-in fuel tanks
- Auto start
- Trailer-mounted units
- Short and long term rental

### **ADDITIONAL SERVICES:**

- Set-up and tear down of rental equipment on sites
- Diesel fuel services

### **LOAD BANK TESTING:**

- Resistive load banks from 10 kW through 3 MW
- Multiple load banks can be connected for higher test requirements
- Reactive load banks available

# WHY YOU SHOULD RENT YOUR GENERATORS FROM US.

## POWER EQUIPMENT

Kelly Generator & Equipment, Inc. is known for state-of-the-art equipment along with premium customer service. We provide:

- Top quality equipment, expertly maintained
- Superior voltage and frequency regulation
- Operating noise levels of 68 or less on smaller units
- Full line of accessories including cable, panels, distribution, etc.
- Automatic safety shutdowns
- Fuel cells provide at least 24 hours of run time
- Auxiliary fuel cells available for extended operation
- On-site planned maintenance ensures maximum performance and efficiency
- Enclosure is fully lockable

## DISTRIBUTION EQUIPMENT

We ensure you have all the necessary equipment to connect your load:

- Transformers available on request
- Cable ramps
- Electric 10 kW heaters
- 4/0 camlock cables and pigtails (rented in 50' sections)
- Automatic transfer switches from 100 to 3000 amps
- Square D I-line panels up to 1200 amps with multiple breaker combinations
- Spider boxes with up to six 110 volt receptacles and twist-lock connections to the generator for hassle free set up
- 6000 Amp "Parallel Box" takes power from multiple paralleled gensets and unifies the cable run for a cleaner installation
