

7 Reasons to Invest in a Home Standby Generator:

1. **Fully Automated** --- You don't have to do anything but your preventative maintenance and we offer a PM contract for that as well.
2. **Safety** --- Professionally installed by a certified Electrical Contractor (which we can coordinate for you) with an ATS that will control the load automatically and safely.
3. **Reliability** --- With a regular exercise schedule you can proactively detect faults that may arise. A PM contract will help with this goal as well.
4. **Fuel Convenience** --- Stand by units can run on the indefinite supply of natural gas which typically goes uninterrupted by even the most severe storms or LP gas which is stored in large tanks that will run for several days.

5. **Quiet** --- These units offer a quiet environment as to not interrupt your lifestyle or your neighbors and can meet most county restrictions as applicable.
6. **Warranty & Product Life** --- With a 3yr warranty on most units and an optional Planned Maintenance contract with KGE you can get a life span of up to 20 years allowing you to meet your investment and more.
7. **KGE** – Not only do you get a product from the world's largest provider of residential standby generators that comes with the backing of the Good Housekeeping Seal, you get the support and trusted expertise of the KGE staff. With over 20yrs in the industry, KGE has a full staff of dedicated, knowledgeable & trained employees standing by to help you with your investment.
